

NAGA PAVAN KUMAR JAVISETTY

AI-Focused Full-Stack Developer

Noida, India | 6301196547 | nagapavankumarjavisetty@gmail.com

GitHub: github.com/PAVANKUAMRVERMAJAVISETTY

Target Roles: AI Full-Stack Developer · Full-Stack Software Engineer · AI Application Developer

AI-focused Full-Stack Developer with a B.Tech in CSE and extensive hands-on experience building production-ready, enterprise-grade web applications and real-time platforms. Expert in React 19, Next.js, TypeScript, Supabase, PostgreSQL, RLS security, and advanced geolocation routing algorithms. Highly proficient in modern AI-assisted software engineering workflows (Cline, Roo Code, Cursor, Aider) to drive rapid, scalable feature delivery. Seeking high-impact software engineering opportunities.

PROFESSIONAL EXPERIENCE

Freelance Full-Stack Developer — Client Projects

Independent Freelance Developer | Noida, India | [2025] – Present

- Architected, developed, and deployed high-performance full-stack web applications, ERP systems, and real-time marketplaces across frontend, backend, and cloud architectures.
 - Engineered secure multi-role access control (RBAC) systems and database-backed workflows using React, Next.js, TypeScript, Supabase, PostgreSQL, and Row Level Security (RLS).
 - Deployed complex client platforms featuring geolocation routing engines, real-time activity streams, custom binary archivers, and payment gateways (Razorpay).
 - Leveraged cutting-edge AI-assisted engineering workflows (Cline, Roo Code, Aider, OpenRouter) for repository analysis, implementation, debugging, and test automation.
-

PROJECTS

URBAN PROPERTIES — Full-Stack Direct Owner Real Estate Platform & Lead Tracking

Client Project / Production Platform

- Tech Stack: React 19, TypeScript, TanStack Router/Start, Supabase (Postgres & RLS), TanStack Query, Vite, Tailwind CSS, PKZip Binary Archiver.
- Built a high-performance real-time property rentals and sales web application featuring a 4-role RBAC hierarchy (Admins, Area Agents, Property Owners, Tenants) secured via Supabase Auth and PostgreSQL RLS.
- Engineered a geolocation area agent routing engine using the Haversine formula to instantly dispatch property inquiries and visitor activities to micro-market territory agents (e.g., Kukatpally, Gachibowli).
- Developed a custom zero-dependency PKZip binary archiver (pure TypeScript store-mode ZIP package generator with native Uint8Array headers and CRC-32 checksums) enabling users to download bulk listing media seamlessly.
- Implemented an unauthenticated lead capture gate ("Unlock Owner Contact") and real-time activity stream to track visitor intent and feed agent dashboards instantly.
- **Live Project** : <https://seedhaproperties.com/>

SHREE GOPI TRADERS — B2B SALON & BEAUTY SUPPLIES E-COMMERCE

Freelance Client Project | Production Deployment

- Developed a B2B wholesale e-commerce platform featuring quantity-based dynamic pricing, product variants, stock tracking, bulk-order inquiries, and WhatsApp support workflows.
- **Live Project**: <https://www.sreegopitraders.com/>

AI NEXUS BLOCK — AI-Powered Developer Research & Engineering Platform

Personal Engineering & Research Project | Production Deployment

- Built an integrated workspace for AI assistance, technical research documentation, and reusable problem/solution referencing using Next.js, TypeScript, and Supabase RLS.
- **Live Project**: <https://ai-nexus-block.vercel.app/>

TRIPPY'S MEHFILL — Intelligent Cloud-Kitchen ERP & Ordering Platform

Client Project | Production Deployment

- Developed a full-stack cloud-kitchen ERP covering menu management, live order tracking, customer workflows, and operational dashboards using React/Next.js, TypeScript, Supabase, and PostgreSQL.
- Implemented secure role-based access control with RLS policies, ensuring strict data privacy and real-time transactional updates.
- **Live Project** : <https://trippysmehfill.vercel.app>

EXTRU TECH — Industry & Professional Network Platform

Freelance Client Project | Production Deployment

- EXTRU TECH — Industry & Professional Network Platform
- Freelance Client Project | Production Deployment
- Developed an industry network connecting students, consultants, and manufacturers with career pathways, formulation inquiries, and integrated Razorpay online payment workflows.
- **Live Project**: <https://extru-tech.vercel.app/>

INTERNSHIP EXPERIENCE

360digrii — Hyderabad, India | Python / Machine Learning & Software Development Internships

Summer Internship (May 2023 – Jul 2023) & ML Internship (Jan 2024 – Jun 2024)

- Built foundational experience in Python, data preprocessing, exploratory data analysis (EDA), and machine learning pipelines.
- Utilized Generative AI and LLM prompting to assist with code generation, debugging, and data processing tasks.
- Developed an academic text-classification project focused on abusive-language detection using Python.

EDUCATION

- **Bachelor of Technology (B.Tech) in Computer Science & Engineering** – Central University of Haryana, Mahendragarh | **May 2024 | CGPA: 6.78/10**
- **Intermediate** – Sri Chaitanya Junior College, Guntur | **Mar 2020 | CGPA: 8.09/10**
- **Secondary School** – Sri Sai Vidya Niketan, Guntur | **Mar 2018 | CGPA: 8.5/10**

Technical Skills

- **Frontend & Frameworks**: React 19, Next.js, TanStack Router/Start, TypeScript, JavaScript, Tailwind CSS, HTML5, Vite, Framer Motion
- **Backend & Database**: PostgreSQL, Supabase (Realtime Streams, Edge Functions), Row Level Security (RLS), REST APIs, Database Design
- **AI & Agentic Engineering**: Agentic Workflows, Cline, Roo Code, Aider, OpenHands, Claude Code, Cursor, Google Antigravity, OpenRouter, Gemini API, Ollama
- **DevOps & Tools**: Git, GitHub, npm, Vercel, CI/CD, Automated Testing, PKZip Binary Encoding, Haversine Geolocation Algorithms

FLAGSHIP ENGINEERING ECOSYSTEM

- AI Nexus Block (Official Creator Portfolio): [Visit Live Platform](#) — Explore Naga Pavan Kumar's personal production platform, featuring advanced AI-driven code analysis, instant bug resolution workflows, and secure PostgreSQL RLS architecture. Designed to evaluate his full-stack engineering expertise and research capabilities at a glance
